MSA FINDINGS

Suncor Energy Inc. did not implement the applicable requirements of EOP-008-AB-1. This is an ongoing contravention starting on July 1, 2019, when EOP-008-AB-1 came into effect.

EOP-008-AB-1 states, in part:

R7 The ISO and each operator of a transmission facility must conduct and document results of an annual test of its operating plan that demonstrates:

R7.1 The transition time between the decision to transfer functionality to the backup control centre following the simulated loss of primary control centre functionality and the time to fully implement the backup functionality; and

R7.2 The backup functionality for a minimum of two (2) continuous hours.

MR7 Evidence of conducting an annual test for backup functionality and documenting the results of the operating plan as required in requirement R7 exists. Evidence may include, but is not limited to, testing documentation or other equivalent evidence.

The MSA is satisfied that the conduct was a contravention of Reliability Standard EOP-008-AB-1, requirement R7.
